EDUCATION

2006 ~ 2010 high education — Vladivostok State University of Economics and Service
Technician, computer engineering and software for automated systems

2006 ~ 2010 higher education — Vladivostok State University of Economics and Service
Bachelor of Applied Informatics

2010 ~ 2012 higher education — Vladivostok State University of Economics and Service
Master of Applied Informatics

EMPLOYMENT

2010 ~ 2012 **Vladivostok State University of Economics and Service**

2010-2012 software engineer

- Implemented several server-side applications from scratch (VBA, C#, Pascal, Python, PHP).
- Rebuilt university-wide Internet traffic billing system to support complex billing tariffs and increase the income(MySQL, PHP, HTML, Python, Microsoft Active Directory, MS SQL 2008, Cisco Systems).
- Provided high-end support for corporate virtualization, email, Internet services and WEB server users, ensured zero downtime for those services (VMware ESXi, vSphere, View; databases MS SQL, MySQL; nginx; Internet proxying via Squid+Websense; mail servers Exim and horde).

2012 ~ 2016 **Rhonda LTD**

2012-2014 **QA engineer**, contract with “Exalt Communications”

- Remote contractor, focused on testing and Quality Assurance of WEB, Command Line and SNMP interfaces of products of the company.
- Prepared hundreds of test cases during Test Suites and Test Plans creation.
- Found dozens of issues and ensured they were fixed properly. Improved testing QA process by implementing automated tests for sanity runs (VBA, Python, Selenium, MS Batch, Linux Shell, sFTP, etc).

2014-2016 **software developer**, contract with “nScaled, an Acronis Company”

- Remote contractor, focused on development and deployment of Disaster Recovery service frontend [Ruby on Rails application (ruby, HAML, HTML, JS, CSS, MySQL, MongoDB, Capistrano)].
- Made a huge impact in project localization from single-language state to project supporting 6 languages, including Japanese and German.
- Made several optimizations in work processes saving tons of time by creating automation scripts for Windows and Linux machines(VBS, MS Batch, Linux Shell, python).

2016 ~ present **Acronis**

2016-2021 **senior software developer**

2021-present **lead software architect**

- Architectural research, design and implementation for the new generation of Disaster Recovery service (python, Go, MySQL, RAML, Docker, OpenStack, VMware vCenter, Microsoft Azure).
- Optimization of work processes by creating and maintaining automation scripts for Windows and Linux machines (python, ansible, MS Batch, Bash, Go, Alfred, VBA).
